

FOX NEWS POLL

Questions 1-57 are for release after 9:00 AM/ET Sunday, January 26, 2020.

Questions 58 & 59 are for release 7:00AM/ET Tuesday, February 25, 2020.

Methodology

Interviews were conducted January 19-22, 2020 among a random national sample of 1,005 registered voters (RV). Landline (226) and cellphone (779) telephone numbers were randomly selected for inclusion in the survey using a probability proportionate to size method, which means phone numbers for each state are proportional to the number of voters in each state.

Results based on the full sample have a margin of sampling error of ± 3 percentage points.

The Fox News Poll is conducted under the joint direction of Beacon Research (D) (formerly known as Anderson Robbins Research) and Shaw & Company Research (R).

Fieldwork conducted by Braun Research, Inc. of Princeton, NJ.

Fox News Polls before 2011 were conducted by Opinion Dynamics Corporation.

Results are of registered voters, unless otherwise noted.

An asterisk () is used for percentages of less than one-half percent.*

A dash (-) represents a value of zero.

Some percentages may not add to 100% due to rounding. In the same way, percentages in “total” columns may be one point more or less than the sum of their parts due to rounding.

For reference: As you know, impeachment by the House of Representative does not remove the President from office. It simply means that a majority of the House thinks that charges against the President are serious enough to justify a trial by the Senate. Two-thirds of the Senators have to vote to convict the President to remove him from office.

The House voted to impeach Clinton at the end of last year and the case is now before the Senate for trial. Do you think the Senate should vote to convict him and remove him from office?

Fox News Poll -- Margin of Error for Subgroups

The Fox News Poll is conducted under the joint direction of Beacon Research (D) and Shaw & Company Research (R). It was conducted by telephone (landline and cellphone) with live interviewers January 19-22, 2020 among a random national sample of 1,005 registered voters.

Results based on the full sample have a margin of sampling error of plus or minus three percentage points. Results among the attached subgroups have larger sampling errors:
