INCIDENT/INVESTIGATION REPORT

Narr. (cont.) OCA: 14-2506-002120

Broward County Sheriff's Office

NARRATIVE Information Incident occurred on the High Seas in international waters. Disney Dream Cruise Ship. The family was walking on the 4th deck when they stopped to take a photo of the daughter, victim Abu. The mother, involved other Abus pointed to the port hole railing and the daughter climbed on the railing and sat down. The daughter lost her balance and fell backward off the railing into the ocean. The victim's father, involved other Abus jumped in the ocean and saved his daughter until the ship was able to launch a rescue boat. Both were recovered and brought to the infirmary on the ship. The father was transferred to Broward Health with a Medical Records. The child did not receive any injuries. DCF was notified and will be sending an investigator.

Date / Time Reported

*Mon 06/30/2025 08:11***Child Overboard Incident****Date:** June 30, 2025**Location:** Disney Dream Cruise Ship, Terminal 4, Port Everglades, 1800 SE 20 St., Fort Lauderdale, Broward County, Florida

On June 30, 2025, I was requested to respond to the Disney Dream Cruise Ship, which was docked at Terminal 4, Port Everglades, located at 1800 SE 20 St., Fort Lauderdale, Broward County, Florida. The response was in reference to a reported incident involving a child who fell overboard from the vessel on June 29, 2025, at approximately 1130 hours, while the ship was sailing in international waters between the Bahamas and Port Everglades.

Upon arrival, I made contact with the ship's security officer, identified as Howard. He advised that the incident occurred on Deck 4, aft, port side. According to Howard, the child had been walking with her parents when they stopped to take a photograph. During this time, the child climbed onto the railing and sat down, subsequently losing her balance and falling backward into the ocean. The child's parents immediately panicked and began calling for help. Approximately one minute later, the father jumped overboard in an attempt to rescue his daughter.

The ship's crew initiated a "Man Overboard" (MOB) protocol and launched a rescue boat. Multiple staff members deployed life rings from the bridge and surrounding areas to provide flotation for both the father and the child. After approximately 15 minutes, the ship completed a turn, and the rescue boat was able to retrieve both individuals safely from the water. At the time of the incident, the vessel was traveling northwest from Lookout Cay in the Bahamas to Port Everglades at a speed of approximately 10 knots.

Security Officer Howard provided a thumb drive containing video footage of the incident. The video was submitted to BSO Evidence via the secure evidence lockers at the District SOC. I surveyed the scene on Deck 4, aft port side, and took photographs of the area where the child had fallen. The railing at the scene was measured and found to be approximately 47 inches in height. All scene photographs were uploaded to Evidence.com.

Timeline of the Incident (June 29, 2025)

- " 1129 hrs: The family walks to the aft port side of Deck 4. The mother gestures toward the porthole railing.
- " 1129 hrs: The child climbs onto the railing, sits down, loses her balance, and falls backward into the ocean approximately 49 feet below.
- " 1130 hrs: The father jumps overboard from the same deck in an effort to save his daughter. The MOB alarm is activated.
- " 1131 hrs: MOB alert is broadcast over the ship's communication system. The U.S. Coast Guard is notified.
- " 1132 hrs: Crew members arrive at the scene. Life rings are deployed. The ship begins turning to initiate recovery.
- " 1137 hrs: A mayday call is issued via radio.
- " 1140 hrs: The rescue boat is launched.
- " 1149 hrs: The rescue boat successfully retrieves both the child and father from the water.

Date / Time Reported

Mon 06/30/2025 08:11

" 1159 hrs: Both individuals are transported to the ship's medical center for treatment.

After gathering this information, I requested to speak with the family. I was informed they had been transported to Broward Health Medical Center for follow-up evaluation by the ship's medical staff.

I interviewed the ship's attending physician, Dr. Chante', who reported that the child presented with **Medical Records**. She was kept under observation in the ship's medical center for nine hours with instructions to follow up with a local hospital upon arrival at port. The father was diagnosed with **Medical Records**. He remained in the ship's medical center until the vessel docked and was subsequently transported to Broward Health Medical Center by Broward Sheriff's Office Fire Rescue.

I then proceeded to the hospital to continue the investigation. The father was listed as a trauma patient. I interviewed him in his hospital room. He reported that the family had been walking on Deck 4 when his wife stopped to take a photo of their daughter sitting on the railing. He stated that he was approximately 10 feet ahead and did not witness the fall. He heard his wife scream and, upon turning around, observed his daughter in the water. He initially ran to get help but, after approximately 45 seconds, decided to jump into the ocean to attempt a rescue. He noted difficulty locating his daughter in the water and admitted losing visual contact temporarily. He was eventually able to reach her and tread water with her until they were rescued. He expressed surprise and relief at their survival.

Hospital staff confirmed the father was admitted with a **Medical Records**. The daughter had no noted injuries and was released from the hospital. I also interviewed the child, who appeared healthy and age-appropriate, though shy and reluctant to speak. She was able to state her name, age, and grade level. I observed her eating breakfast and interacting normally for a five-year-old.

I interviewed the mother, who confirmed the details reported by the father. She stated that she initially did not believe her daughter had fallen into the ocean, as she assumed a glass barrier was present. Once she realized her daughter was in the water, she screamed for help and tried to maintain visual contact with both the child and her husband as the ship turned.

I made a mandatory report to the Florida Abuse Hotline (1-866-532-2873). The report was taken by Operator Jan, ID #197, who advised that an investigator would respond to the hospital.

Sergeant V. Perez was advised of the investigation and notified command. I was informed that a detective from the Special Victims Unit (SVU) would respond. I met with Detective C. Favatta (CCN 17020) at the vessel and accompanied him during his follow-up investigation.

My Body-Worn Camera (BWC) was activated during this incident. All video, audio, and related transcripts captured are considered part of this report and will be retained accordingly.

On June 30, 2025, Deputy Argenti responded to the Disney Dream Cruise Ship, which was docked at Terminal 4, Port Everglades, located at 1800 SE 20th Street, Fort Lauderdale, Broward County, Florida, regarding a child who fell overboard from the vessel on June 29, 2025, at approximately 11:30am, while the ship was sailing in international waters between the Bahamas and Port Everglades. As a result of the fall, the child's father, [Abuse Victim] had jumped into the water to rescue his child. The child was identified as [Abuse Victim], a 5 year of age female.

NARRATIVE:

On June 30, 2025, at 2:00pm, I was called out to investigate this case by Broward Sheriff's Office (BSO) Special Victims Unit (SVU) Supervisor Yanessa Ayra. She instructed me to respond to Port Everglades and meet with Deputy Argenti, who was the primary Deputy assigned to the case. She provided me with the aforementioned synopsis of events and directed me to conduct an investigation into an allegation of child neglect.

On the same date, I met with Deputy Argenti at Port Everglades, Terminal 4 dockside. Deputy Argenti again affirmed the aforementioned information and provided me with security camera footage on a flash drive, which was given to him by the ship's security staff. The security camera footage captured the incident in its entirety, excluding the at sea rescue. The flash drive footage was uploaded into evidence.com and the flash drive sealed and placed into evidence. The following timeline of incident events was notated from Deputy Argenti from July 29, 2025:

11:29am: [Abuse], [Abuse], and [Abuse] walk to the aft port side of Deck 4. [Abuse] gestures toward the porthole railing to take a picture.

11:29am: [Abuse] climbs onto the railing, sits down, loses her balance, and falls backward into the ocean approximately 49 feet below, into the water.

11:30am: [Abuse] jumps overboard from the same deck to rescue [Abuse]. The man overboard (MOB) alarm is activated.

11:31am: MOB alert is broadcast over the ship's communication system. The U.S. Coast Guard is notified.

11:32am: Crew members arrive at the scene. Life rings are deployed. The ship begins turning and maneuvering to initiate rescue/ recovery procedures.

11:37am: A mayday call is issued by the ships radio.

11:40am: The rescue tender is launched from deck 4.

11:49am: The rescue tender successfully located and retrieved both Abuse and Abuse from the water.

11:59am: Abuse and Abuse are transported to the ship's medical center for treatment.

On the same date of my investigation, I responded to "aft deck 4" and viewed the scene where the incident occurred. Present was Deputy Argenti and ship security staff. I observed the incident located to have several large open "porthole" type windows. The portholes were open air, and blatantly not protected by any clear material. There was a railing/banister in front of the porthole, which measures approximately 44 inches tall. The distance from the porthole to the water is approximately 49.3ft, and 4 decks from the bottom of the ship. Ship security staff notated to me that when the incident occurred, the ship was moving at approximately 10 knots, and located within international waters, off the Bahamas. When Abuse fell, her small body figure did not trigger the man overboard (MOB) sensors. The MOB sensors were triggered when Abuse jumped from the ship. One of the ships Captains on the bridge of the vessel was able to keep a visual of Abuse in the water, and ultimately able to guide the rescue tender to his location. The ship had already disembarked all passengers from the cruise, and there were no witnessed notated to me at the time of the investigation, who saw the actual incident take place.

There was no security camera footage provided from the ship of Abuse and Abuse in the water, and no footage of the rescue. As a result, I compiled videos from the social media platform "Tik Tok", where several passengers had video recorded the rescue. The videos were downloaded from the application and uploaded into evidence.com for retention. The videos were found from user accounts "cmd.91", "lifeofchandler", "selenavip1", and "timarie904".

On the same date, while still on the ship, I spoke with Doctor Chante Charles, who was the lead Doctor during the incident. Doctor Charles was also a crew member onboard the rescue tender and aided in the rescue operation. According to Doctor Charles, Abuse presented with Medical Records. Abuse was kept under observation in the ship's medical center for nine hours with instructions to follow up with a local hospital upon arrival at port. Abuse was diagnosed with Medical Records. He remained in the ship's medical center until the vessel docked and was subsequently transported to Broward Health Medical Center by Broward Sheriff's Office Fire Rescue upon docking.

On the same date, at 3:58pm, I responded to Broward Health Medical Center and met with Abuse, who was undergoing treatment for injuries he sustained from the incident. I obtained an audio/ video recorded sworn statement from Abuse regarding the incident. The statement was recoded on my body worn camera (BWC). Abuse provided me with his identifying information. He then raised his right hand and was sworn in, further understanding what perjury is and the penalty for lying under oath. Abuse identified his wife as Abuse Victim, and his daughter as Abuse. He described that they boarded the Disney Cruise on June 26, 2025, and the ship was slated to return on June 30, 2025. This was the families first cruise. Abuse described the incident occurred on June 29, 2025, at about 11:00am. The family was exploring new parts of the ship on the running trail of deck 4. The family was walking together, but Abuse walked ahead of Abuse and Abuse. Shortly after, Abuse audibly heard a scream from Abuse. Abuse described the scream as desperate and knew by the type of

scream that something was wrong. Abuse ran back Abuse and saw Abuse missing. Abuse told Abuse that Abuse fell off the boat. Abuse then ran and called for assistance and began to panic. Abuse looked in the water and saw Abuse. He then jumped from deck 4, in an effort to rescue Abuse.

Once in the water, Abuse was not able see Abuse due to the waves, and he began to call her name. He heard Abuse audibly call back to him, and he told her to keep yelling so he could find her. After an unknown amount of time lapsed, Abuse located Abuse in the water. He described her as conscious and talking, and she did not have any flotation devices. Abuse grabbed her and was able to hold her, until they were rescued by the tender. Abuse then handed Abuse off to the tender. Abuse was not sure how long he was in the water or how far he had to swim.

Abuse stated that the incident appeared to be an accident, and something like this hasn't happened to his family before, as this was their first cruise. According to Abuse, Abuse cannot swim, and suffered no injuries. As a result of the incident, Abuse sustained Medical Records. Abuse was presented a BSO waiver for medical records, which he consented to provide by signing the waiver. Abuse also told me that Abuse and his children were currently at the 4 points by Sheridan hotel, located in Dania Beach.

On the same date, at 5:40pm, I responded to the 4 points by Sheridan hotel, located in Dania Beach, and met with Abuse in her hotel room. I subsequently obtained an audio/ video recorded sworn statement from her regarding the incident. The statement was captured on my BWC. Present in the room, was a representative from Disney, who stepped into the hallway. Also present was Abuse, who was sleeping in a bed, Abuse Victim, who was being put down for a nap. Abuse provided me with her identifying information. She then raised her right hand and was sworn in, further understanding what perjury is and the penalty for lying under oath. Abuse verified the dates of the cruise starting June 26, 2025, and ending on June 20, 2025. Abuse stated that the incident occurred on June 29, 2025, at about 11:29am, while the family was walking and exploring the ship. Abuse described she was walking with Abuse and Abuse, and they were on deck 3 or 4. Abuse stated that while walking, she saw porthole windows, and she had offered for her daughter to take a picture in the porthole. Abuse described that Abuse approached the porthole and stood in front of it, then climbed and positioned herself-sitting on the railing. Abuse was facing Abuse when Abuse then lost her balance and fell backwards. Abuse described that she had assumed the porthole had a window or Plexi-glass, and she thought that Abuse would be caught by the glass, but instead, she kept falling, ultimately off the ship and into the water. Abuse then screamed for Abuse to come and help and was panicking. Abuse stated that ultimately, Abuse jumped off the deck and into the water. Abuse described that she went and got help and stated that the incident occurred very quickly.

Abuse elaborated that while on the cruise of previous days, Abuse had taken numerous pictures in several other portholes/ windows on the ship. She provided me with a picture of Abuse laying in a porthole with a window on it. The picture was uploaded into evidence.com. In addition to those pictures, Abuse had taken pictures of Abuse, leading up to the fall, and a picture of the fall. Abuse provided me with her cellphone, where I viewed the pictures. The pictures were also live pictures, and when streamed together, depict a few second video of the child getting up on the railing, and falling backwards into the water. With Abuse Victim permission, the videos were emailed to me and uploaded into evidence.com. After reviewing the live picture on her phone, I observed meta data from the picture providing a GPS location of the moment she fell off the ship. The coordinates are 25.00000 degrees north, 77.4 degrees west. This was uploaded into evidence.com.

Abuse described that Abuse suffered no apparent injuries and sought medical evaluation on the ship directly after the incident. Abuse denied any previous child abuse investigations in the past. Abuse stated that Abuse has had swim lessons in the past but cannot swim. Abuse stated that she felt like there should be coverings on the windows, and cited that Disney is responsible for what had occurred.

CASE STATUS:

Presently, although this case is being viewed as an accident, this investigation has determined that per Florida's child neglect statute, there is a failure to supervise element to this case, where the statute states the following: "A caregiver's failure or omission to provide a child with the care, supervision, and services necessary to maintain the child's physical and mental health, including, but not limited to, food, nutrition, clothing, shelter, supervision, medicine, and medical services that a prudent person would consider essential for the well-being of the child". Abuse ultimately facilitated the child taking a picture on the railing/ porthole, after she assumed that the porthole window was covered and secured, which was not the case. Upon looking at the window myself, as a prudent person, I immediately saw that the window was open to the air, and did not have a covering. This act facilitated by Abuse placed the child in a life-threatening situation. As a result, the child fell from the ship and into the water, in an avoidable accident. Based on this, this case is being sent to the Broward County State Attorney's Office for a case review of the investigation. This case will be classified as PENDING INACTIVE. The State Attorney's decision will be outlined in a supplement to the case when made available by them, and the case classification can be changed based on their decision.

Furthermore, based off the ship's home port and location of embarkation being Port Everglades, which resides within Broward County, Florida, and the incident occurring within international waters, your Affiant has jurisdictional authority to investigate this incident.

CASE NUMBER: 14-2506-002120

Synopsis: This supplement is being written as a follow up to my original investigation. This was case sent to the Broward County State Attorney's Office for a case review of the information.

Narrative:

On Tuesday, September 16, 2025, I was emailed an SAO declination letter, after the case was declined for prosecution where ASA Melissa Kelly staetd the following "While the defendant's conduct is arguably negligent and irresponsible, it does not rise to the egregious level of conduct necessary to establish criminal culpable negligence. Therefore, in light of the facts of this case along with the relevant case law, I am declining one count of Child Neglect Without Great Bodily Harm."

(Yes/no and explain why or why not-exceptional clearances only)

1. Have the identity of the offender been clearly established? Yes, the offender was positively identified as Abuse Victim Abuse

2. Has adequate information to support an arrest, charge, and prosecution of the offender been obtained? Yes, probable cause exists for the offender, for neglect of a child.

3. Is the exact location of the offender known so that he can be taken into custody immediately? Yes

4. Are there any reasons beyond Law Enforcement's control that prevent the arrest, charging, and prosecution of the offender? Yes, the State Attorney's Office declined to file charges on this case.

I uploaded the State Attorney's declination letter into evidence.com.

Case Status: This investigation has established that the offender is the perpetrator to this child neglect, and there is enough information to charge her in connection with this offense. The offender's location is also known, whereas he could be taken into custody. However, due to the State Attorney's declination of filing any charges no arrest will be made in this case. Based on the above criteria this case is EXCEPTIONALLY CLEARED.
