

ONE HUNDRED NINETEENTH CONGRESS

**Congress of the United States**  
**House of Representatives**

COMMITTEE ON THE JUDICIARY

2138 RAYBURN HOUSE OFFICE BUILDING

WASHINGTON, DC 20515-6216

(202) 225-6906  
[judiciary.house.gov](http://judiciary.house.gov)

January 14, 2026

The Honorable Robert J. Conrad, Jr.  
Director, Administrative Office of the U.S. Courts  
and Secretary, Judicial Conference of the United States  
Thurgood Marshall Federal Judiciary Building  
One Columbus Circle NE  
Washington, DC 20544

Dear Judge Conrad:

The Committee on the Judiciary is investigating allegations of improper attempts by the Environmental Law Institute (“ELI”) and its Climate Judiciary Project (“CJP”) to influence federal judges.<sup>1</sup> Public reports have documented concerns around apparent efforts by ELI and CJP to influence judges who potentially may be presiding over lawsuits related to alleged climate change claims.<sup>2</sup> These efforts appear to have the underlying goal of predisposing federal judges in favor of plaintiffs alleging injuries from the manufacturing, marketing, use, or sale of fossil-fuel products.<sup>3</sup>

The Judicial Conference of the United States (“JCUS”) and the Administrative Office of the U.S. Courts (“AO”) acknowledge risks related to privately funded educational programs for judges. These risks include, for example, “[t]hat influence [over federal judges] . . . may be exerted through program content, contact between judges and those who litigate before them, and perquisites provided to program attendees.”<sup>4</sup> Despite this clear acknowledgment of risks, current JCUS policies appear to focus mainly on perquisites, while leaving the door open for

groups like ELI and CJP to exert influence through program content and contact between judges and those who litigate before them.<sup>5</sup>

Judicial impartiality is a fundamental pillar of American jurisprudence. The activities of ELI and CJP, however, appear to be designed to bias judges in climate-related cases. Although ELI's has claimed that CJP aims to provide "neutral" information to the judiciary about "the science of climate change" as established among the expert scientific community,<sup>6</sup> CJP has itself acknowledged that its mission centers on influencing judges' decision-making on "controversial" topics involving "fast moving science."<sup>7</sup>

The materials that ELI and CJP use at judicial seminars are generally not made public, which itself is a cause for concern.<sup>8</sup> The limited portions of CJP's "Climate Science and Law for Judges Curriculum" that are publicly available seem designed to improperly influence judges in favor of plaintiffs.<sup>9</sup> ELI has argued to judges that the political-question doctrine should have only "limited" relevance in climate lawsuits,<sup>10</sup> that countervailing research should be rejected because "[n]ot every scientific argument deserves to be taken seriously,"<sup>11</sup> and that "the social cost of

carbon dioxide” is a proper method for calculating damages,<sup>12</sup> All are positions advanced by plaintiffs. Additionally, these topics are all actively litigated issues, and ELI’s *ex parte* advocacy on them raises questions about the impartiality of the judges connected with ELI’s seminars.<sup>13</sup> Despite ELI’s contention that “CJP does not participate in litigation, provide support for or coordinate with any parties in litigation, or advise judges on how they should rule on any issue or in any case,” recent evidence has come to light calling these denials into question.<sup>14</sup>

ELI and CJP’s conduct is especially concerning because ELI and CJP characterize their efforts as “neutral” and “objective,” which appears to be questionable at best.<sup>15</sup> Based on their publicly documented affiliations and position statements, the ELI-selected experts who instruct the judges on questions of supposed climate “science” are not neutral third parties, but are known associates of organizations allied with the radical decarbonization movement.<sup>16</sup> CJP boasts that it has educated more than 2,000 judges at the federal and state levels.<sup>17</sup> At the same time, ELI and CJP have concealed the identities of the judges who have attended or participated in ELI and CJP training sessions or conferences, and they have not been transparent about the funding sources for these events.<sup>18</sup>

<sup>18</sup> Isaac, *supra* note 8 at 4.

The lack of transparency related to ELI and CJP “training” of federal judges appears to be enabled by JCUS and AO policies. Although privately funded seminars are ostensibly subject to disclosure obligations and federal judges have attended numerous programs affiliated with ELI and CJP in the past, the Report of Privately Funded Seminars discloses only a single program associated with ELI and CJP.<sup>19</sup> This lack of complete disclosure likely stems, at least in part, to the very narrow nature of the disclosure obligations under the Privately Funded Seminars Disclosure policy in place since 2007.<sup>20</sup>

Under that policy, disclosure is only required when a significant purpose of the program is education of federal or state judges, and the organizer of the program offers to reimburse more than \$480 of federal judges’ expenses associated with attending the program.<sup>21</sup> If no perquisites are involved—and a judge is not reimbursed—no disclosure obligations would appear to exist.<sup>22</sup> Even where these initial conditions are met, the disclosure rules explicitly exclude programs hosted by governmental organizations; state and local bar associations; national, state, and local subject matter bar associations; the Judicial Division of the American Bar Association; and the National Judicial College.<sup>23</sup> ELI and CJP appear to be leveraging these broad exceptions and carveouts to avoid disclosure requirements.

For example, ELI and CJP have partnered with the Federal Judicial Center, which does not trigger any disclosure requirements. ELI represents that “CJP began in 2018 in coordination with the [Federal Judicial Center] . . . in response to demand from the judiciary for education about climate science.”<sup>24</sup> Concerns about this coordination have drawn significant attention and rightful calls for scrutiny.<sup>25</sup>

ELI and CJP have also partnered with the AO disclosure-exempt National Judicial College on programming, again sidestepping oversight. ELI and CJP boast of “numerous collaborations with the National Judicial College,” from which “we have gained invaluable knowledge from the judges participating in our programs.”<sup>26</sup> Although the full extent of this collaboration is, once again, unclear, ELI and CJP appear to have hosted various programs, including programs on “Rising Seas and Litigation: What Judges Need to Know about Warming-

Driven Sea-Level Rise,”<sup>27</sup> “Introducing the Climate Judiciary Project,”<sup>28</sup> a “webinar on hurricanes, their societal impacts, and associated legal considerations,”<sup>29</sup> and “Climate Change & Water: Droughts,”<sup>30</sup> among others. Yet, apparently because of the issues discussed above with respect to JCUS and AO policies, ELI and CJP avoid disclosure and oversight.<sup>31</sup>

The exceptionally limited disclosures related to ELI and CJP-affiliated judicial programming are even more troubling given ELI’s and CJP’s stated goal to target judges who are hearing climate-related cases. In 2022, ELI and CJP made clear that “[w]hether through dissemination of modules of the curriculum, or by delivery of seminars and webinars, in the next three years [ELI and CJP] will focus our outreach on states and federal jurisdictions where [climate-related] cases will be heard.”<sup>32</sup> In light of this intentional targeting of judges poised to hear climate-related cases, it seems clear that the JCUS and AO disclosure rules have fallen short.

We look forward to engaging with the JCUS and AO to ensure that the Privately Funded Seminars Disclosure is updated to prevent abuse by advocacy organizations masquerading as fair and impartial educational programs, and to ensure that such programs are subjected to adequate scrutiny and oversight going forward. The publicly available Report of Privately Funded Seminars is time-limited from December 2022 to the present.<sup>33</sup> We ask that you provide copies of all disclosures that have been made pursuant to the Privately Funded Seminars Disclosure policy between 2018 and December 2022. Further, we ask you provide any disclosures made pursuant to the Privately Funded Seminars Disclosure policy from 2018 to the present that are not otherwise reflected in the Report of Privately Funded Seminars.

We ask that you provide these materials and information as soon as possible, but no later than 5:00 p.m. on January 28, 2026.

The Supreme Court has recognized that Congress has a “broad and indispensable” power to conduct oversight, which “encompasses inquiries into the administration of existing laws, studies of proposed laws, and surveys in our social, economic, or political system for the purpose of enabling Congress to remedy them.”<sup>34</sup> The Committee is authorized to conduct oversight of “[t]he judiciary and judicial proceedings” and “[f]ederal courts and judges,” pursuant to the
